AERIAL VIEW

PROPERTY SUMMARY:

This is an urban flat with a built area of 164 m² on a plot of 1333 m², originally built in 2003 (23 years old) in the municipality of Torrelodones (Madrid). The building consists of: vivienda of 78 m², vivienda of 55 m², elementos comunes of 31 m². The property is subject to a horizontal-property regime.

KEY ISSUES TO RESOLVE:

- **Estimated ITE / IEE:** Confirm the exact status of the building inspection report (IEE)
- **Declared floor areas:** Clarify the gap between the advertised and cadastral surface area
- **River flood hazard:** Ask about past floods and any paid claims (insurer or Consorcio)
- **Radon:** Get a radon measurement (3 months) and agree who pays for works if it is high
- **Energy certificate:** Ask for recent energy bills before weighing the energy rating
- **Wildfire and forest proximity:** Check wildfire coverage with the insurer

Also: Relevant industrial facility, Proximity to major roads, Urban planning classification, Electricity lines, Industrial land, Proximity to railway, Age — explained in their section

AND ADDITIONALLY…

- **Issues observed at a previous viewing:** Use the price and time-on-market history during the negotiation

HOW TO READ THE STATES

No impact	Moderate risk	High risk	Not provided	No data
Normal or very low risk	Worth checking during the visit	Impact or alert detected	Depends on data the buyer did not provide	Not assessed or no official record

Information and liability: Informative and indicative report prepared by Hogarfax as of its issue date, cross-referencing official public data (Cadastre, IGN/CNIG, MITECO, CSN, INE and other public bodies) with proprietary algorithms, plus listings and contributions from users, which we do not verify one by one. It is not an appraisal (Order ECO/805/2003), a land registry, cadastral or planning certificate, a technical survey, or legal, tax or financial advice, and it does not replace them. Hogarfax does not guarantee that third-party sources are complete, up to date or error-free, and is not liable for decisions based solely on this document. Check any relevant data with the competent bodies and professionals before making an offer, paying a deposit or signing. For the recipient's personal use.

Methodology: cross-referencing of official public sources through internal calculations and models. Classification (green/amber/red/blue/grey); grey or blue = depends on data the buyer did not provide.

LAND REGISTRY STUDY

What the Spanish Land Registry says about this property, explained and cross-checked with the rest of this report. The original extract (*nota simple*) is attached at the end of this PDF.

LAND REGISTRY	REGISTERED PROPERTY NO.	UNIQUE REGISTRY CODE (CRU)	DATE OF THE EXTRACT	VERIFICATION CODE (CSV)
Puerto Ejemplo	**10.482**	**00000000010482**	**14 Oct 2026**	**EJEMPLO0DEMO0000**

1	No	INVERSIONES COSTA EJEMPLO, S.L.	Matches
CHARGES IN FORCE	PENDING DOCUMENTS	OWNERSHIP	AREA REGISTRY / CADASTRE

THE PROPERTY IN THE REGISTRY

Urban property: building with 4 bungalows

Location as recorded: *«la parcela 7 del Plan Parcial Las Gaviotas, en Playa Ejemplo»*

	LAND REGISTRY	CADASTRE
Homes	**4 bungalows**	4
Built area (each bungalow)	**98.5 m²**	99 m²
Private garden (each bungalow)	**210.4 m²**	—
Plot	**1,320 m²**	1,325 m²

In amber: the Cadastre has 4 homes, but the Registry has no horizontal division registered and describes them as bungalows, not as homes.

OWNERSHIP

INVERSIONES COSTA EJEMPLO, S.L. · B00000000
100 % of full ownership (*pleno dominio*)

Acquired by purchase (*compraventa*) on 18 May 2004

Check that the person or company selling is the registered owner. Private individuals are shown without name, as required by data-protection law.

CHARGES AND RIGHTS OVER THE PROPERTY

Mortgage (*hipoteca*)
The property secures a loan. Normally the seller pays it off with the sale money at signing. In favour of BANCO EJEMPLO, S.A. Amount: €240,000.
What to do: Make sure the deposit contract requires it to be cancelled at signing, and check later that the cancellation is registered.

Tax lien (*afección fiscal*)
A note tying the property, for a period, to a tax due on a previous transfer. Expired on 12 Apr 2016: it no longer has any practical effect.
What to do: Nothing to do: it is only on record as history.

Easement (right of way) benefiting the property
It is a right this property holds over another one: it benefits you rather than limiting you.
What to do: Nothing to do; good to be aware of it.

There are no documents pending registration.

WHAT THE CROSS-CHECK REVEALS

One registered property for several homes
The Cadastre splits the plot into 4 homes, but the Land Registry records them as a single property, with no horizontal division (*división horizontal*) registered. Buying all 4 means buying the whole property, which is fine. But if you later want to sell or mortgage any of them separately, the horizontal division will first have to be executed and registered (deed, town hall licence and registration), with its own cost and timescale.

The cadastral use is not residential
The Cadastre classifies the property as *Ocio y Hostelería* (leisure and hospitality), while the Land Registry describes it as bungalows. Check with the town hall which use is authorised if you plan to live there. Bear in mind too that the price references in this report are for houses: a holiday-use bungalow may be worth a different amount.

Not coordinated with the Cadastre
The Land Registry has not matched the property's boundaries with the Cadastre map. This is common and not a problem in itself, but the registered boundaries and areas have not been graphically verified.

Registered for holiday rental
The extract includes its short-term rental registration with licences VV-00-0-00000001, VV-00-0-00000002, VV-00-0-00000003, VV-00-0-00000004. Check with the regional authority whether the licence remains valid after a change of owner.

IMPORTANT: THIS IS NOT LEGAL ADVICE

This study is an informative summary prepared by Hogarfax from the extract. It is not legal advice of any kind, has no legal validity, and does not replace the extract itself, a registry certificate or the advice of a lawyer or notary.

A Spanish land registry extract is for information only and does not certify the content of the registry entries; only a registry certificate proves ownership and charges against third parties. It reflects the position on its date of issue, which may have changed.

The official document is the attached extract, exactly as issued by the Registry; if anything in this study differs from it, the extract prevails. Review the transaction with a lawyer or notary before signing.

Information and liability: Informative and indicative report prepared by Hogarfax as of its issue date, cross-referencing official public data (Cadastre, IGN/CNIG, MITECO, CSN, INE and other public bodies) with proprietary algorithms, plus listings and contributions from users, which we do not verify one by one. It is not an appraisal (Order ECO/805/2003), a land registry, cadastral or planning certificate, a technical survey, or legal, tax or financial advice, and it does not replace them. Hogarfax does not guarantee that third-party sources are complete, up to date or error-free, and is not liable for decisions based solely on this document. Check any relevant data with the competent bodies and professionals before making an offer, paying a deposit or signing. For the recipient's personal use.

Methodology: cross-referencing of official public sources through internal calculations and models. Classification (green/amber/red/blue/grey); grey or blue = depends on data the buyer did not provide.

TIMELINE OF THE PROPERTY

- **Deed declaring the new building*** OFFICIAL DATA — **March 2001**
  Land Registry extract, registered property no. 12345 (fictitious).
- **New building registered at the Land Registry*** OFFICIAL DATA — **May 2001**
  Land Registry extract, registered property no. 12345 (fictitious).
- **Building constructed** OFFICIAL DATA — **January 2003 (approx.)**
  Year of construction per the Cadastre. 164 m² built, 1st floor.
- **Works completed (Land Registry note)*** OFFICIAL DATA — **February 2003**
  Land Registry extract, registered property no. 12345 (fictitious).
- **Purchase registered at the Land Registry*** OFFICIAL DATA — **June 2003**
  Land Registry extract, registered property no. 12345 (fictitious).
- **Refurbishment recorded at the Cadastre** OFFICIAL DATA — **January 2016 (approx.)**
  The cadastral refurbishment year (2016) is later than construction: declared works took place.
- **Possible sale listing** INDICATION — **March 2023 (approx.)**
  Asking price: €549,000. Professional agent.
- **Energy certificate registered** OFFICIAL DATA — **March 2025**
  Consumption rating: F. Emissions rating: F.
- **Probable price reduction of 4.3%** INDICATION — **June 2026**
  From €470,000 to €450,000, observed between two Hogarfax readings.
- **Offer submitted** CONTRIBUTED — **July 2026 (approx.)**
  A buyer offered €415,000, rejected.
- **Seller's counteroffer** CONTRIBUTED — **July 2026 (approx.)**
  The seller asked for €440,000, rejected.
- **Land Registry extract obtained for this report*** OFFICIAL DATA — **July 2026**
  Land Registry extract, registered property no. 12345 (fictitious).

* From the Land Registry: included in the Complete Report (with nota simple).

Coverage of this tracking. **2** people have contributed data · **1** observations of the listing · **1** versions with real changes · **5** comparable witnesses observed · tracked since June 2026. This record grows on its own. Every recorded viewing, every logged call and every listing a Hogarfax user opens enriches it — and not just for this home, for its street too. Next time you open it, it will say more than today.

How to read the market milestones. The market milestones on this page come from listings that a user linked to this cadastral reference (87% match with the plot, linked by a single user, unconfirmed). They are not official data: they are indications and should be read as such. Hogarfax does not guarantee the listing matches this property.

What we cannot tell you. No price on this page is a deeded price: only the land registry reflects the actual transaction price. We do not verify each person's contribution one by one: we publish it stating who said it and how many people back it, so that you can judge it yourself. An empty record does not mean nothing has happened: it means nobody has told it yet. Dates prior to the first observation or contribution are estimated to the month or year, never to the day.

OFFICIAL DATA Cadastre and public records · INDICATION Listing linked to the plot by users · CONTRIBUTED Provided by someone who visited or tracked the home

NATURAL HAZARDS

Natural factors that may affect safety, preservation or health.

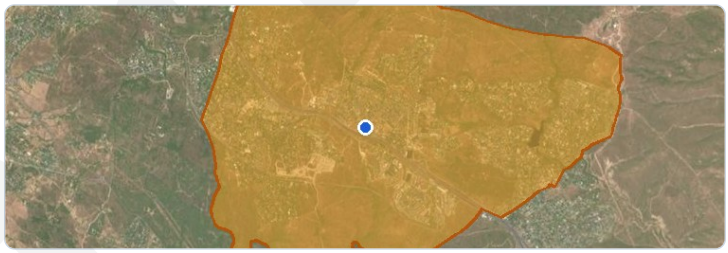

CHECK	CONCLUSION	ANALYSIS SOURCE	STATUS
River flood hazard	Area with flood risk	Geospatial analysis with official cartography	ISSUE DETECTED
The property is located in an area where water may affect the building during episodes of heavy rain. During the visit it is advisable to ask whether this has happened before, to check garages or ground floors and to see how the surroundings drain the water.			
Radon	Area with high radon risk	Official record (municipal level)	ISSUE DETECTED
In this area it is more likely that radon will build up, especially in properties in contact with the land. During the visit it is advisable to check the ventilation, to inspect basements or ground floors and to ask whether any measures have been taken.			
Wildfire and forest proximity	Low wildfire risk	Geospatial analysis with official cartography	ATTENTION RECOMMENDED
No relevant forest mass is seen next to the property, nor notable municipal records. This is a favourable signal, though it does not rule out later changes in the surroundings. Torrelodones recorded 4 wildfires and 16 minor fires between 2006-2015.			
Coastal flood hazard	No impact detected	Geospatial analysis with official cartography	NO IMPACT DETECTED
Seismicity	Low seismic hazard	Official record (municipal level)	NO IMPACT DETECTED

RIVER FLOOD HAZARD

Area with flood risk. The property is located in an area where water may affect the building during episodes of heavy rain. During the visit it is advisable to ask whether this has happened before, to check garages or ground floors and to see how the surroundings drain the water. Plot outlined in blue; the affected area uses the same colour coding as the rest of the report.

RADON

Area with high radon risk. In this area it is more likely that radon will build up, especially in properties in contact with the land. During the visit it is advisable to check the ventilation, to inspect basements or ground floors and to ask whether any measures have been taken. Plot outlined in blue; the affected area uses the same colour coding as the rest of the report.

INCENDIOS Y MASA FORESTAL

Example illustration over a real aerial photo of the plot; it does not represent official cartography for this specific issue.

Scope of this block. This block analyses, from official cartography and registries, the probability of river and coastal flooding, the area's historical seismicity, wildfire risk and the natural presence of radon in the subsoil. It cannot determine whether the property has suffered damage in the past, and it does not replace a technical inspection, an on-site radon measurement or checking with your insurer before signing.

Information and liability: Informative and indicative report prepared by Hogarfax as of its issue date, cross-referencing official public data (Cadastre, IGN/CNIG, MITECO, CSN, INE and other public bodies) with proprietary algorithms, plus listings and contributions from users, which we do not verify one by one. It is not an appraisal (Order ECO/805/2003), a land registry, cadastral or planning certificate, a technical survey, or legal, tax or financial advice, and it does not replace them. Hogarfax does not guarantee that third-party sources are complete, up to date or error-free, and is not liable for decisions based solely on this document. Check any relevant data with the competent bodies and professionals before making an offer, paying a deposit or signing. For the recipient's personal use.

LAND USE AND RESTRICTIONS

Legal or environmental constraints that may affect use or construction.

CHECK	CONCLUSION	ANALYSIS SOURCE	STATUS
Urban planning classification	Conditional use	Official land-use registry (SIU)	ATTENTION RECOMMENDED
The property is in an intermediate situation. It may require planning procedures, involve certain conditions or await development before it can be used normally.			
Electricity lines	Nearby	Geospatial analysis with official cartography	ATTENTION RECOMMENDED
There are power lines nearby. It is worth checking whether they are visible from the property and whether they affect the feel of the surroundings.			
Cadastral use	Residential use	Cadastre	NO IMPACT DETECTED
Rivers and watercourses	No impact from watercourses	Geospatial analysis with official cartography	NO IMPACT DETECTED
Coast and coastal protection	No restrictions from the coast	Geospatial analysis with official cartography	NO IMPACT DETECTED
Livestock trails (cañadas)	No livestock trails nearby	Geospatial analysis with official cartography	NO IMPACT DETECTED

CLASIFICACIÓN URBANÍSTICA

Example illustration over a real aerial photo of the plot; it does not represent official cartography for this specific issue.

LÍNEAS ELÉCTRICAS

Example illustration over a real aerial photo of the plot; it does not represent official cartography for this specific issue.

Scope of this block. What this block analyses: the urban classification of the land according to the Ministry of Housing's Urban Information System (SIU), and the restrictions arising from proximity to rivers and watercourses (Public Water Domain), the sea (Maritime-Terrestrial Public Domain) and high-voltage power lines. These are some of the most relevant restrictions, but not the only ones that can affect a property. If you are interested in the property, request a nota simple from the Land Registry: it lets you verify ownership and detect charges (mortgages, seizures, resolutory conditions or other entries) and easements (rights of way, light and views, aqueduct, among others) that do not appear in this report. It is also advisable to check with the town hall which restrictions apply to your intended use of the property: planning regulations are defined at municipal level, and both the level of detail and the response times vary from one town hall to another.

Information and liability: Informative and indicative report prepared by Hogarfax as of its issue date, cross-referencing official public data (Cadastre, IGN/CNIG, MITECO, CSN, INE and other public bodies) with proprietary algorithms, plus listings and contributions from users, which we do not verify one by one. It is not an appraisal (Order ECO/805/2003), a land registry, cadastral or planning certificate, a technical survey, or legal, tax or financial advice, and it does not replace them. Hogarfax does not guarantee that third-party sources are complete, up to date or error-free, and is not liable for decisions based solely on this document. Check any relevant data with the competent bodies and professionals before making an offer, paying a deposit or signing. For the recipient's personal use.

Methodology: cross-referencing of official public sources through internal calculations and models. SURROUNDINGS AND NUISANCES

Nearby conditions that may affect comfort, noise or quality of life.

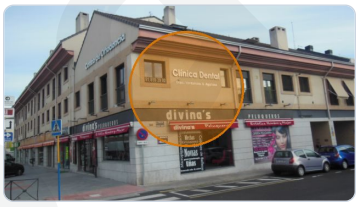

CHECK	CONCLUSION	ANALYSIS SOURCE	STATUS
Relevant industrial facility	Industrial facility very close	Geospatial analysis with official registries	ISSUE DETECTED
There is a registered industrial slaughterhouse close to the property. During the viewing it is worth asking about smells, activity noise and heavy-vehicle traffic at loading times.			
Industrial land	Industrial surroundings nearby	Geospatial analysis with official cartography	ATTENTION RECOMMENDED
There is industrial activity nearby. During the visit it is worth walking around the surroundings, identifying the type of activity and assessing whether it affects comfort or the perception of the place.			
Proximity to major roads	Road nearby · 101 m	Geospatial analysis with official cartography	ATTENTION RECOMMENDED
The property is at a distance where traffic may be noticeable. During the visit it is worth paying attention to the noise, checking the orientation of the property in relation to the road and seeing whether there are acoustic barriers or buildings that reduce the impact. About 101 m away.			
Proximity to railway	Railway nearby	Geospatial analysis with official cartography	ATTENTION RECOMMENDED
The property is at a distance where passing trains may be noticeable. During the visit it is worth checking how often trains pass and whether the noise reaches the interior.			
Proximity to a dam	No dams nearby	Geospatial analysis with official cartography	NO IMPACT DETECTED
Nearby energy facilities	No nearby energy facilities	Geospatial analysis with official cartography	NO IMPACT DETECTED
Nearby petrol station	No petrol stations very close	Geospatial analysis with official registries	NO IMPACT DETECTED
Vacant plots next to the home	No vacant plots next door	Cadastre (local copy)	NO IMPACT DETECTED
Proximity to airport	No impact from an airport	Geospatial analysis with official cartography	NO IMPACT DETECTED

PROXIMITY TO MAJOR ROADS

SUELO INDUSTRIAL

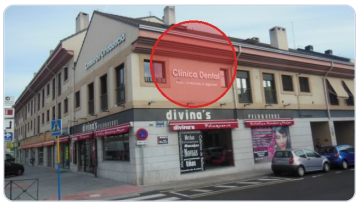

Example illustration over a real aerial photo of the plot; it does not represent official cartography for this specific issue.

AFECCIÓN POR PROXIMIDAD A LÍNEA FERROVIARIA

Example illustration over a real aerial photo of the plot; it does not represent official cartography for this specific issue.

INSTALACIÓN INDUSTRIAL RELEVANTE

Example illustration over a real aerial photo of the plot; it does not represent official cartography for this specific issue.

Scope of this block. This block measures, using official sources, the distance to infrastructure and land uses that may affect comfort (busy roads, industrial land and facilities, energy facilities, dams, airports, railway lines) and the safety of the municipality. It does not measure actual noise, pollution or quality of life: that can only be checked during the viewing, at different times of day.

Information and liability: Informative and indicative report prepared by Hogarfax as of its issue date, cross-referencing official public data (Cadastre, IGN/CNIG, MITECO, CSN, INE and other public bodies) with proprietary algorithms, plus listings and contributions from users, which we do not verify one by one. It is not an appraisal (Order ECO/805/2003), a land registry, cadastral or planning certificate, a technical survey, or legal, tax or financial advice, and it does not replace them. Hogarfax does not guarantee that third-party sources are complete, up to date or error-free, and is not liable for decisions based solely on this document. Check any relevant data with the competent bodies and professionals before making an offer, paying a deposit or signing. For the recipient's personal use.

Methodology: cross-referencing of official public sources through internal calculations and models. CHECK	CONCLUSION	ANALYSIS SOURCE	STATUS
IEE · Madrid register	IEE registered	Official regional or municipal record	ISSUE DETECTED
Inspection result (technical outcome): Desfavorable. Building status (separate administrative field): Exento. These are two independent fields of the official register; showing different values in each does not mean the record contradicts itself. Accessibility: Satisface. Energy rating: F. The register data is informative and does not replace an in-person technical inspection.			
Energy performance certificate	F	Official regional record	ISSUE DETECTED
Registered energy performance certificate with a F rating for non-renewable primary energy (260 kWh/m²·year). CO_2 emissions rating F (54.6 kgCO_2/m²·year). Certificate date: 15/03/2025.			
Building age	23 years	Official Cadastre record	ATTENTION RECOMMENDED
The building is 23 years old: ask for the building inspection (ITE/IEE) and the last 3 years of owners' meeting minutes to see any approved levies, and check installations during the visit. For this apartment in a block of around 164 m², 23 years old, the typical cost to bring it up to date is around ≈ 33,682 €. It can rise to 73,330 € in severe cases. We show the typical scenario, not the sum of every worst case: the €/m² of each item spans from a light repair to a full intervention. This is an estimate based on type, area and age, not a quote.			
Declared areas	164 m² (Cadastre)	Listing/Land Registry vs Cadastre cross-check	ATTENTION RECOMMENDED
A relevant difference is detected in the declared square metres: Listing 180 m² (+9.8%). It is worth verifying with a land registry extract, plans or a cadastral certificate before signing. · Land Registry: pending · Measured: pending			
Habitability (minimum area)	Meets threshold	Cadastre vs. technical rules cross-check	NO IMPACT DETECTED

- **Cracks on the rear facade** · Estructura y humedades **(suspected)**

WHAT THE PHOTOS DO NOT SHOW

«You can hear the road with the windows closed»
«The inner courtyard does not appear in the listing photos»

Contributed by people who visited the property. Hogarfax publishes it stating its origin; it does not verify each entry.

Scope of this block. This block combines three kinds of information with different levels of certainty: official and documentary data (surface area, building inspection report, energy certificate, age), rough estimates (renovation cost) and information contributed by people who have visited the property. The Cadastre does not necessarily certify the physical surface area; a contributed observation is not a technical diagnosis; a renovation range is not a quote; the inspection report must be read by its literal fields.

Information and liability: Informative and indicative report prepared by Hogarfax as of its issue date, cross-referencing official public data (Cadastre, IGN/CNIG, MITECO, CSN, INE and other public bodies) with proprietary algorithms, plus listings and contributions from users, which we do not verify one by one. It is not an appraisal (Order ECO/805/2003), a land registry, cadastral or planning certificate, a technical survey, or legal, tax or financial advice, and it does not replace them. Hogarfax does not guarantee that third-party sources are complete, up to date or error-free, and is not liable for decisions based solely on this document. Check any relevant data with the competent bodies and professionals before making an offer, paying a deposit or signing. For the recipient's personal use.

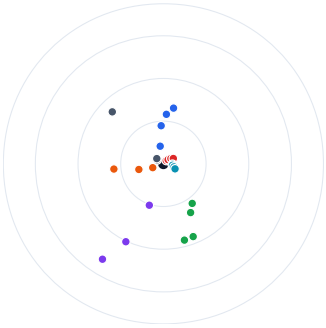

Methodology: cross-referencing of official public sources through internal calculations and models. Classification (green/amber/red/blue/grey); grey or blue = depends on data the buyer did not provide.

RECOMMENDATIONS AND QUESTIONS

Everything below comes from something this report actually detected. Nothing here is a guess: if a check came back clean, it raises nothing here.

14	5	8
POINTS TO CHECK	FROM RED FLAGS	FROM AMBER FLAGS

- **Wildfire and forest proximity** Low wildfire risk · No relevant forest mass nearby
- **Industrial land** Industrial surroundings nearby · Possible indirect influence
- **Relevant industrial facility** Industrial facility very close · Possible nuisance
- **Proximity to major roads** Road nearby · 101 m · Possible impact on the surroundings
- **Proximity to railway** Railway nearby · Possible occasional impact
- **Declared floor areas** 164 m² (Cadastre) · Listing 180 m² (+9.8%)
- **Urban planning classification** Conditional use · May require formalities or prior development
- **Electricity lines** Nearby · Possible impact
- **Age** 23 years · 23 years old · Indicative renovation ≈ 33,682 €
- **Estimated ITE / IEE** IEE registered · Desfavorable
- **Energy certificate** F · Energy rating F
- **River flood hazard** Area with flood risk · Water may affect the property
- **Radon** Area with high radon risk · It may build up indoors

AND ADDITIONALLY…

- **Issues observed at a previous viewing** Damp on the bedroom ceiling · Cracks on the rear facade

Detailed questions and recommended checks are available in the Essential Report.

General criteria for this page. These recommendations combine, when relevant, questions for the seller and neighbours, official enquiries, and technical or documentary checks. The seller alone does not certify technical, planning or insurance matters.
